

Automate twice daily temperature recordings

Meeting the latest requirements, with automatic data capture, alerts and twice daily temperature notifications.

MULTIPLE LOCATIONS

Manage multiple stores in one dashboard.

TEMPERATURE MONITORING

Insight into your storage environment.

REAL TIME ALERTS

Maintain the efficacy of your product.

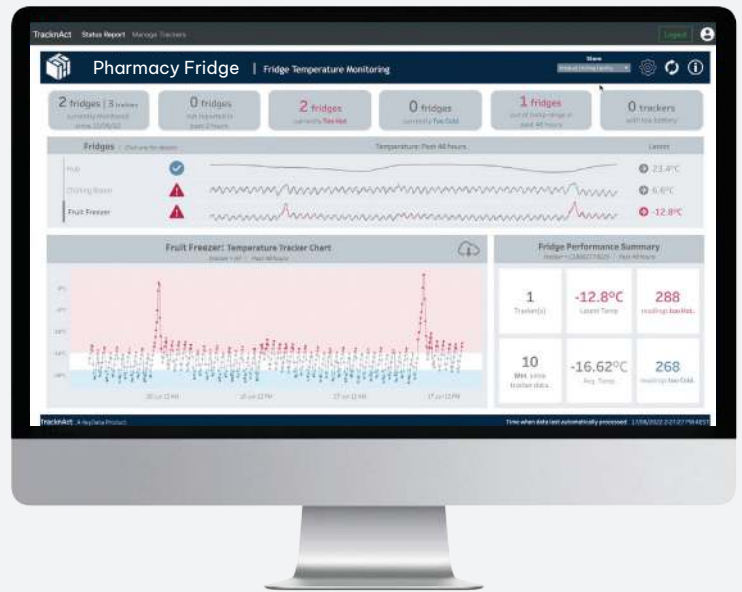

ASTOUNDING BATTERY LIFE

Even if the power is out, it keeps logging temperature.

Tracknact is here to support compliance

Tracknact lives in your fridges, supporting QCPP compliance and maintaining consistency with **Strive for 5** Guidelines:

- Real-time temperature capture in 5-minute increments.
- Access to a live dashboard with downloadable data.
- Alerts that let you know when your fridge temperature deviates, that don't rely on power.
- Tamper proof data.
- Options for cellular and/or Wifi.
- Active monitoring of your devices health.

Committed to Sustainability

Tracknacts' partner's 5G devices are recyclable

Designed for these applications

Cold Chain

Pharmaceutical

Fresh Produce

Livestock

Time Sensitive

Specifications

Tracknact platform

Eliminate manual monitoring, save time & money.

No need to manually checking or record temperatures in fridges anymore. It isn't always practical or accurate and wastes time and money.

Secure Return on Investment in months.

Pharmacy experts have told us that it costs up to \$4,000 a year on manual temperature recording and audit. Our solution costs far less than that. So, you quickly secure an undeniable return on your investment.

Compliance & Reporting? Sorted

Tracknact stores and displays your temperature data while allowing you to download or export it for audit purposes. It means compliance and reporting are made simple.

World-leading trackers don't rely on power

You can still receive real-time alerts and be able to monitor your temperatures in a power outage. These world-leading trackers use cellular connectivity to offer you certainty.

WiFi CONNECTIVITY

Temperature Range

-25° to 85° C

Accuracy

±0.5° C steady state accuracy (0° C to +65° C)

WiFi Gateway

Connects to your pharmacy network and power-point

Fridge Temperature Sensor

Bluetooth 4.1 compliant (supports Low Energy feature), Up to 150 m (line of sight) Battery life warranty - 2 years

CELLULAR CONNECTIVITY

Temperature Range

-20°C to 60°C

Accuracy

±0.5°C, NIST Traceable ISO 17025 calibration certificate

Cellular Hub

Connects to power-point, with 30 days rechargeable battery back-up. Records ambient temperature. Continues transmitting if main power is lost

Fridge Temperature Sensor

Wireless Protocol - Bluetooth v4.2 Up to 100m (line of sight) Battery life warranty - 2 years
